NETWORK SECURITY SYSTEMS PLUS, INC
CAPABILITIES STATEMENT

NETWORK SECURITY SYSTEMS PLUS, INC

NSSPLUS IS A VETERAN-OWNED CYBERSECURITY SERVICES COMPANY

NSSPlus is a top tier, midsize service delivery solutions company serving on the front lines of the cybersecurity frontier. Recognized for our cyber leadership, business acumen, technical agility, and innovative solutions, we have been verified by the U.S. Department of Veterans Affairs Center for Verification and Evaluation (CVE) as a Veteran Owned Small Business (VOSB).

As a trailblazing Cybersecurity Service Provider (CSSP), contracted to support the cybersecurity systems of U.S. Cyber Command (USCYERCOM) accredited U.S. Department of Defense (DoD) and civilian agencies, NSSPlus has implemented a spectrum of protect, detect, respond, and sustain services for government customers with demanding infrastructure/network security priorities for 16 years.

NSSPlus delivers Cybersecurity services to our customers in accordance with industry best practices, Federal, & DoD standards. We are dedicated to providing our customers and business partners with the highest level of technical expertise. This requires access to the most powerful security technologies and tools, to ensure that their information system security posture is at an acceptable level of risk and their security policies and procedures are accurately documented and enforced.

OUR MISSION IS SIMPLE

NSSPlus offers its customers information assurance and security technologies to protect information in an era of increasing interconnectivity, accompanied by ever-increasing threats.

Our goal is to make a key contribution to the safeguard and assurance of information systems and network cybersecurity.

CERTIFIED EXPERIENCED PROFESSIONALS

NSSPlus employs more than 150 industry certified cybersecurity professionals.

Our highly qualified and seasoned engineers and consultants are armed with a comprehensive knowledge of relevant security technologies and policies. More than 85% of our team is Certified Information Systems Security Professionals.

WE SPECIALIZE IN THE FOLLOWING CYBERSECURITY SOLUTIONS

CYBERSECURITY SERVICE PROVIDER
Since adversaries do not sleep, NSSPlus maintains its customer's cybersecurity 24/7/365. We assess potential cyberattacks & anomalous activity in real time to combat emerging threats.

RED TEAM, BLUE TEAM & PENETRATION TESTING
Our seasoned penetration testers aggressively identify threat vectors from outside your network and work with your team to close them minimizing the ability of attackers to damage your business.

NETWORK SECURITY MONITORING OPERATIONS
NSSPlus actively performs monitoring activities including SIEM logging and management, behavioral monitoring, intrusion detection, and asset discovery and inventory.

INCIDENT RESPONSE & FORENSICS
We respond 24/7/365 to security incidents using our unique 5I methodology providing a structured approach. Our Forensics Team proactively and reactively provides malware analysis capabilities.

VIRTUAL SECURITY OPERATIONS CENTER (VSOC)
Our vSOC proactively manages security challenges 24/7/365, with our ability to track, correlate, and remedi-ate incidents, events, and risks faster, avoiding downtime while enhancing your capabilities.

CYBERSECURITY AWARENESS & TRAINING
Our Cybersecurity instructors deliver cutting-edge instruc-tion to fulfill regulatory requirements and tailored offerings to fit your needs.

CYBER HUNT
The purpose of our Cyber Hunt services is to step away from antiquated, reactive practices and implement a robust proactive security posture that identifies network anoma-lies, malicious activity, and potential cyber threats.

CYBER VULNERABILITY MANAGEMENT
We find vulnerabilities before attackers do, with a proactive program of identification, prioritization, and remediation & mitigation.

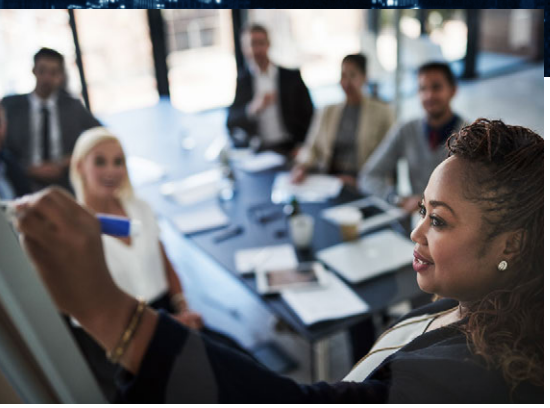
RISK AND VULNERABILITY ASSESSMENT
We address compliance, risk management, and vulnerabili-ty assessments with a programmatic approach continuous-ly reducing risk over time.

CYBER INFRUSTRUCTURE ENGINEERING
NSSPlus designs, implements, deploys, and manages cyber infrastructure assets including: firewalls, VPN, IPS/IDS, DLP, packet capture, endpoint protection, and more.

SOFTWARE ASSURANCE
NSSPlus employs a robust software assurance process that analyzes code, investigates use and misuse, remedi-ates risk, and improves reliability through a 7 step process.

CYBER WARFARE
NSSPlus understands the nature and is prepared to go to battle in the "Fifth Domain: Cyber Warfare," and has integrated the model into the core of its business.

NSSPlus provides support for the ongoing analysis of threats capable of impacting our customers' IT assets based on 24/7/365 monitoring, review of programmatic and technical security controls, combined with daily review of open source / unclassified and classified threat warnings and bulletins by our certified cybersecurity experts.



"NSSPlus offers its customers information assurance and security technologies to protect information in an era of increasing interconnectivity, accompanied by ever-in-creasing threats. Our goal is to make a key contribution to the safeguard and assurance of information systems and network cybersecurity."

– Felix A. Thomas
Founder, CEO & President
